The general purpose of earthing system is to protect life and property in the event of 50/60 Hz faults (short-circuit) and transient phenomena (lightning, switching operations).

**Guide to Grounding Systems - electrical-engineering-portal.com** Grounding System Design & Planning A grounding design starts with a site analysis, collection of geological data, and soil resistivity of the area. Typically, the site engineer or equipment manufacturers specify a resistance-to-ground number.

**Electrical Grounding System Design - E&S Grounding Course EE-5: Grounding System Design Calculations 1- Course Description:** This course is intended to prepare the target persons with the ability to perform all electrical grounding system design for Domestic, Commercial and Industrial Facilities and AC Substations.

**Course EE-5: Grounding System Design Calculations ...** the design of a proper grounding system is certainly complex and should be left to a qualified engineer, the ... .
