Chemistry and Biochemistry Courses Optical activity (=the ability to rotate the plane of polarized light) is a direct result of chirality. Often times, the chirality is based on the existence of at least one chiral center, which has four different ligand attached to it. In the broadest sense, natural products include any substance produced by life. Natural product - Wikipedia 1. Introduction. In 1909, Charles Tanret, whilst investigating the ergot fungus, *Claviceps purpurea*, which devastated rye grain, isolated a unique crystalline sulfur-containing compound, later identified as a trimethylbetaine of 2-thiol-l-histidine. This water soluble thiol, named ergothioneine (EGT) after the ergot fungus, is known to be ... Ergothioneine; antioxidant potential, physiological ...
